

ADVANCED SOLUTIONS. BOTTOM-LINE THINKING.

Etak is your innovative and forward-thinking business partner. We combine your goals with our expertise in order to realize your business advantage.

Our mandate is to provide solutions that optimize your existing architecture, and avoid expenditures that you don't need.

CONSULTATION SERVICES

Etak assesses your current technologies and recommends solutions that complement your corporate goals. Utilize our expertise in usability analysis, system architecture, graphic design and software development to enhance your existing architecture and create your ideal solution.

SOLUTION DEVELOPMENT

We design custom software solutions to fit your specific business requirements. Etak works with your business units to understand your objectives, and tailors the solution to meet your goals. Our solutions go beyond the application to include corporate identity, interoperability, extensibility, and support systems.

GRAPHIC DESIGN

Etak understands the power of good design and what it can bring to your corporate image. Our designs unify your corporate identity by providing a consistent and professional image to your customers: graphical application design, web design, brochures, business cards and more!

Your Business Advantage**

OUR APPROACH

With over 10 years experience in the information technology industry Etak knows that creating winning solutions takes much more than just programming. A fine balance of modularity, scalability, usability and interoperability are required to create robust sustainable systems.

Etak's goal is providing customers a solution which is tailored to their requirements, with a focus on leveraging existing in-house or third party technologies. Leveraging existing technologies enables customers to implement their solution faster and usually with lower costs.

**Winning solutions
that make sense!**

Our Best Fit Policy integrates a customer centric approach with advanced ideas. Customized software solutions, strategic consulting, system analysis or project management: Our Best Fit approach will ensure that you get the solution you need and avoid the costs that you don't.
